

PILOT ROPES

Pilot rope is used to run power cables for larger line work. The rope is 3-ply of the highest quality, made of polyethylene-reinforced polypropylene. The pilot rope has an extremely high strength in relation to its weight, is very durable and has a low elongation, which is important for longer distances. The line is maximally UV-stabilized and floats in water.

Polypropylene Rope	
Construction	Straked
Type	Floatable
Durability	Very strong
Elongation	4%
Color	Green, Green/Red, Green/Yellow

Polypropylene Rope Green

3-ply, very strong and UV-stabilized.

Pr.No.	Ø mm	Weight / m	Length	Breaking point
7512-060550	Ø6	17 g	550 m	780 kg
7512-061100	Ø6	17 g	1 100 m	780 kg
7512-080500	Ø8	30 g	500 m	1 380 kg
7512-081504	Ø8	30 g	1 500 m	1 380 kg
7512-101500	Ø10	45 g	1 500 m	2 030 kg
7512-102000	Ø10	45 g	2 000 m	2 030 kg
7512-122000	Ø10	65 g	2 000 m	2 875 kg

Polypropylene Rope Green/Red

3-ply, very strong and UV-stabilized.

Pr.No.	Ø mm	Weight / m	Length	Breaking point
7512-081501	Ø8	30 g	1 500 m	1 380 kg
7512-101501	Ø10	45 g	1 500 m	2 030 kg
7512-102001	Ø10	45 g	1 500 m	2 030 kg
7512-122002	Ø10	65 g	2 000 m	2 875 kg

Polypropylene Rope Green/Yellow

3-ply, very strong and UV-stabilized.

Pr.No.	Ø mm	Weight / m	Length	Breaking point
7512-081503	Ø8	30 g	1 500 m	1 380 kg
7512-101502	Ø10	45 g	1 500 m	2 030 kg
7512-102002	Ø10	45 g	1 500 m	2 030 kg
7512-122001	Ø10	65 g	2 000 m	2 875 kg
